

Continuous monitoring of the integrity of H₂ transport ducts

CONFIDENTIAL

the next **PANGEA**

THE NEXT PANGEA

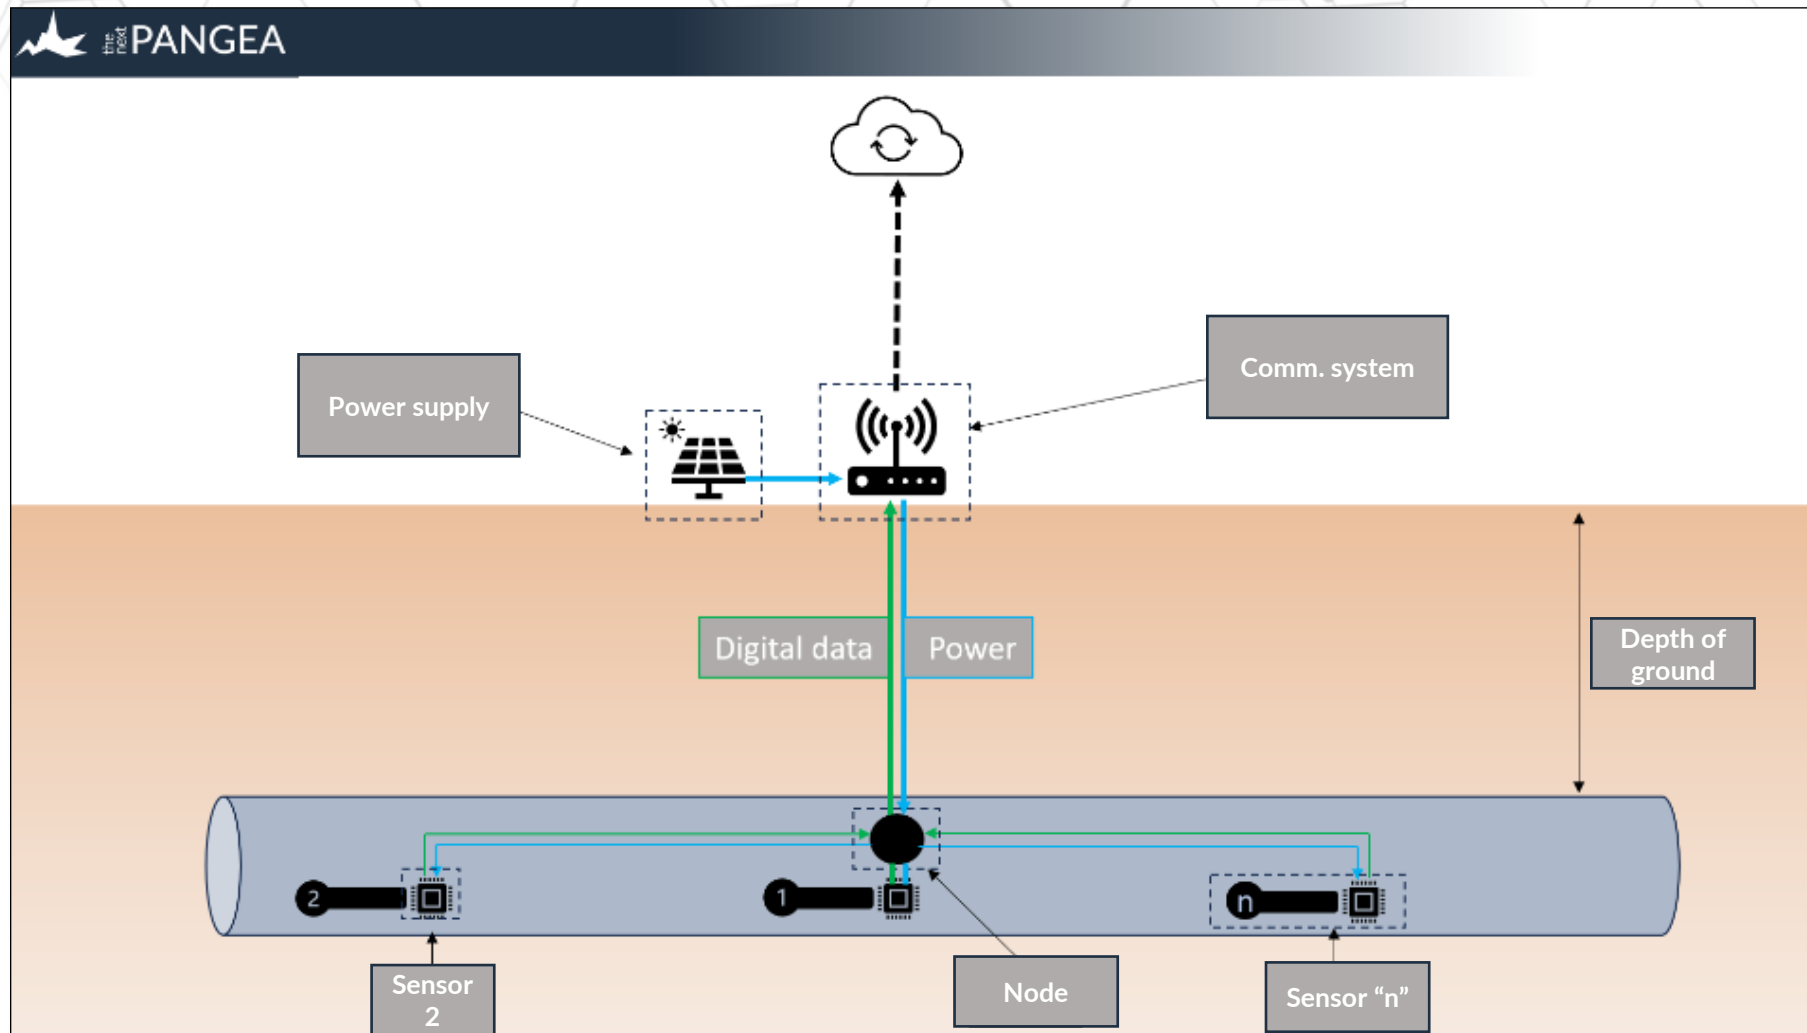

- Technological company focused on the **industrial sector**.
- Co-founded by “*ArcelorMittal Innovación, Investigación e Inversión*”, among others.
- Oriented towards the creation and exploitation of **technological products** by integrating exponential technologies.

THE NEXT PANGEA

- Hydrogen-based economy requires safe and secure transport ducts.
- Current monitoring technologies, such as ILIs, have certain limitations.

THE NEXT PANGEA

THE NEXT PANGEA

Nanostructured carbon-based sensors offering:

- Continuous monitoring.
- Rapid detection and prevention of defects.
- Information about embrittlement areas.

Continuous monitoring of the integrity of H₂ transport ducts
